EXPERIENCE

Software Development Analyst
Jun 2026 - Present
BOSCH BRAZIL

- Develop full-stack software for global corporate solutions using .NET, C#, Angular, TypeScript, Node.js, Java, and relational databases.
- Design scalable architectures, integrations, and internal platforms focused on automation, customer experience, and high-performance business processes.
- Own DevOps responsibilities with GCP, Cloud Run, GKE, Kubernetes, Terraform, Docker, and CI/CD pipelines for DEV, QA, and PROD deployments.
- Support release management using SemVer, coordinating versioning, deployment readiness, and production delivery across environments.
- Apply clean architecture, DDD, TDD, code reviews, and automated testing with Jest and Cypress to improve software quality and maintainability.
- Automate AI-enabled workflows with n8n, integrating internal systems and processes through secure, low-coupling services.

Stack: .NET, C#, Angular, TypeScript, GCP, Cloud Run, GKE, Kubernetes, Terraform, CI/CD, Docker, PostgreSQL, MySQL, REST APIs, Jest, Cypress.

Digital Solutions Technician
Jan 2025 - Jun 2026
BOSCH BRAZIL

- Built and maintained full-stack solutions for internal and global corporate projects using Angular, Node.js, Java, C#, and relational databases.
- Contributed to high-impact innovation projects in global teams, translating complex business needs into efficient technical solutions.
- Integrated internal systems with APIs and external services while keeping security, scalability, and low coupling as priorities.
- Supported database modeling and performance improvements with PostgreSQL and MySQL.

Digital Solutions Apprentice
Aug 2023 - Jan 2025
BOSCH BRAZIL

- Supported backend development with PHP and Java, data modeling with MySQL, and frontend development with React and Angular.
- Used Git and code review workflows while applying clean code principles and structured software development practices.

Internal Sales Assistant
Dec 2022 - Aug 2023
ASAAS

- Supported Inside Sales, Business Development, and Expansion teams with prospecting, lead qualification, CRM organization, and sales analysis.
- Used Excel, PowerPoint, Pipedrive, and reporting routines to improve commercial processes and decision-making.

CORE STACK

.NET | C# | Angular | TypeScript | GCP | Cloud Run | GKE | Kubernetes | Terraform | CI/CD | Docker | PostgreSQL | Clean Architecture | DDD | TDD | SemVer

SELECTED PROJECTS

Crissia
SaaS platform for thrift stores with multi-tenant management, inventory, sales, shopping bags, shipments, finance, authentication, and PWA support.

Worship Flow
Private production app for worship ministries with 30+ users, role-based access, schedules, email reminders, and external integrations.

FocusFlow
Public SaaS-style productivity platform with authentication, real-time sync, Pomodoro workflows, statistics, and Firebase hosting.

DBMind Agent
AI-powered database assistant that generates SQL and answers business data questions using streaming chat and PostgreSQL.

EDUCATION

Full Cycle
Lato Sensu MBA in Software Architecture
Feb 2026 - Aug 2027

Catolica de Santa Catarina
Degree in Systems Analysis and Development
Oct 2024 - Apr 2026

EBAC
Full Stack Python Developer
Mar 2023 - Oct 2024

LANGUAGES

Portuguese: Native

English: Full Professional / C1 Advanced

CERTIFICATIONS

EFSET English Certificate 69/100 (C1 Advanced)

TOEFL Junior Standard Test - Gold Certificate, ETS, 2020

SQL for Data Analysis

Networking Basics
